

A vertical grey bar on the left side of the page contains several white squares of varying sizes and positions. One square at the top right of this bar has a red border, while the others have white borders.

“Business before Technology”

Not the kind of credo you would expect from an IT department, is it?

But then System Foundry is a different kind of IT department. The kind that works for today’s small business by bringing you all the benefits of an internal IT department without the costs and hassles.

Your business needs come first

First we understand your business goals, then we design and deliver affordable IT tools that will get you where you want to go.

What does System Foundry do for your business?

- IT infrastructure and network design
- Legacy system integration
- Web site design
- E-Commerce
- Hosting
- Custom application development
- Ongoing technical support and advice
- Complete outsourced technical support for your business

Expert, Affordable IT

- Lower cost solution compared to internal IT staff
- Single-source reliability for all software and hardware issues
- Dedicated contact who knows your business
- Available 24/7 support and rapid response

TECHNOLOGY

Unix

AIX, HP-UX, SCO, Linux
